Fresno del Coto is a luxurious residential complex composed of 8 independent villas, each one with its own private pool. Designed on one level, the properties are surrounded by terraces of various sizes, which allow the enjoyment of every sunlight hour, all year round. Each villa is set on a plot from 1000 m². Notable features include a fence made from artificial heather mesh, which ensures privacy without blocking natural light. The front of the plot is accented with a white-finished concrete wall. For your convenience, each villa is equipped with a pedestrian door with video intercom, a motorized sliding door for vehicles, and its own private...

parking area within the plot. The central highlight of each plot is the private pool with two spotlights controlled from the living room. For further convenience, a shower is also included. The private garden, with areas of artificial grass and stones, is completed with native trees adding a touch of greenery to the whole.
